Tirupur - 641602, India

Education

Bachelor of Information Technology,
Dr. N.G.P. Arts and Science College
06/2024 – Present | Coimbatore
Focus areas: Software Engineering, Database Management Systems, Mobile Application Development.

Higher Secondary Education (12th Grade), Science,
Tirupur
2013 – 2024
Focus on Computer Science fundamentals, Mathematics, and logical problem-solving.

Technical Skills

Programming Languages
Java, Python, JavaScript, Dart

Mobile Development
Android Studio, Flutter, Firebase

Web Technologies
HTML, CSS, JavaScript, DOM Manipulation, REST APIs

Database & Backend
Firebase, MySQL, Node.js, Express.js, JSON, REST APIs

Tools & Platforms
VS Code, Postman, Netlify, Git

Other
API Integration, Rule-Based AI Systems, Debugging, Performance Optimization, Frontend-Backend Integration

Conference and Symposium Presentations

AI-Based Medical Report Analysis and Hospital Recommendation System
12/2024
International Conference

Professional Summary

Computer Science student with hands-on experience in Android development, web application development, and API integration. Skilled in building real-time applications using Java, Python, JavaScript, and Firebase. Seeking an opportunity to apply technical knowledge to real-world software development projects.

Academic Projects

AI-Based Laboratory Test Interpretation Assistant
2025
Technologies: Python (Flask), HTML, CSS, JavaScript
- Developed a web application that simplifies medical laboratory report interpretation for users.
- Implemented rule-based AI logic to identify abnormal values such as unrealistic blood sugar or hemoglobin levels.
- Built logic to detect suspicious or manipulated reports based on medical inconsistencies.
- Designed a clean, user-friendly interface with plain-language explanations of medical parameters.

Live News Portal System (Real-Time Application)
2025
Technologies: JavaScript, Firebase, REST APIs
- Integrated real-time news APIs to automatically fetch and display the latest news.
- Built flash news, category-wise updates, and date-wise filtering features.
- Implemented an admin module for managing news content and AI-based daily summary generation.
- Displayed real-time data such as gold rate, petrol price, and other dynamic information.

Mobile Shop Management Android Application
2025
Technologies: Android Studio, Java, Firebase
- Developed modules for product inventory management and customer record tracking.
- Implemented billing functionality for handling sales transactions.

Smart Interview Preparation System Using AI and Performance Analysis
12/2024
Technical Paper Presentation

Mobile Shop Management System Using Android and Firebase
12/2024
Project Paper Presentation

Safe Route Tracking System Using Real-Time Location and Safety Analysis
12/2024
Technical Symposium Presentation

Certifications & Achievements

Full Stack Development Certification
2024 – 2025
Gained comprehensive knowledge of frontend and backend technologies, including HTML, CSS, JavaScript, database integration, and full application development lifecycle.

Hackathon Achievement - 2nd Prize Winner
2025
Developed an innovative, functional real-time solution within a limited time frame; collaborated in a team and presented the project to judges.

Web Development Competition - 1st Prize
2025
Designed and developed a responsive, high-quality web application, focused on UI/UX and performance optimization.

Strengths

- Strong analytical and problem-solving abilities
- Quick learner with adaptability to new technologies
- Ability to work on real-time and practical applications
- Good teamwork and communication skills
- Self-motivated and dedicated to continuous improvement

- Used Firebase for real-time data storage and synchronization with a simple UI for shop owners.

Blood Count Based Hospital Recommendation System
2025
Technologies: Android Studio / Python (Flask), Firebase / MySQL
- Processed key blood parameters (hemoglobin, white blood cells, platelet count) to assess severity.
- Implemented rule-based logic to identify abnormal values and match patient conditions to specialized hospitals.
- Used database systems to store patient records and hospital information.

Smart Interview Preparation Application
2025
Technologies: Android Studio / Flutter, Java / Dart, Firebase
- Built interview question practice modules across technical, HR, and aptitude categories.
- Implemented quiz-based functionality to evaluate performance and track progress.
- Integrated rule-based/AI feedback suggestions, resume tips, and commonly asked interview questions.

Safe Route Tracker Application
2025
Technologies: Android Studio / Flutter, Java / Dart, Firebase, Google Maps API
- Developed location tracking and route suggestion modules based on safety parameters.
- Integrated map services for navigation and highlighted safer paths using predefined conditions.
- Added emergency alert and live location sharing features with trusted contacts.

Snake Game Application
2025
Technologies: Java / Android Studio
- Implemented core game mechanics: snake movement, food generation, and collision detection.
- Developed a score tracking system and handled game loop, controls, and difficulty scaling.
